

Body Dysmorphia

– an under recognised condition in general practice.
Patients present with eating disorders, obesity,
plastic surgery and mental health concerns.

Speakers

Dr Karen Gwee – Psychiatrist

The many forms of body dysmorphia in general practice

Mr Julian Choi and Mr Ramez Bassari – UGIT and bariatric surgeons

The obese patient - when should the GP suggest bariatric surgery as a treatment option

Dr Vlad Milovic – Plastic surgeon

Plastic surgery options for patients after massive weight loss

Learning outcomes

1. Recognise the symptoms of body dysmorphia to uncover any underlying mental health conditions.
2. Outline the risks associated with obesity and treatment options such as bariatric surgery.
3. Identify and implement a recall system for patients who have undergone weight loss surgery.
4. Identify plastic surgery options for patients after massive weight loss.
